

EUMODIC Annual Meeting

25—26 March 2010
Brussels

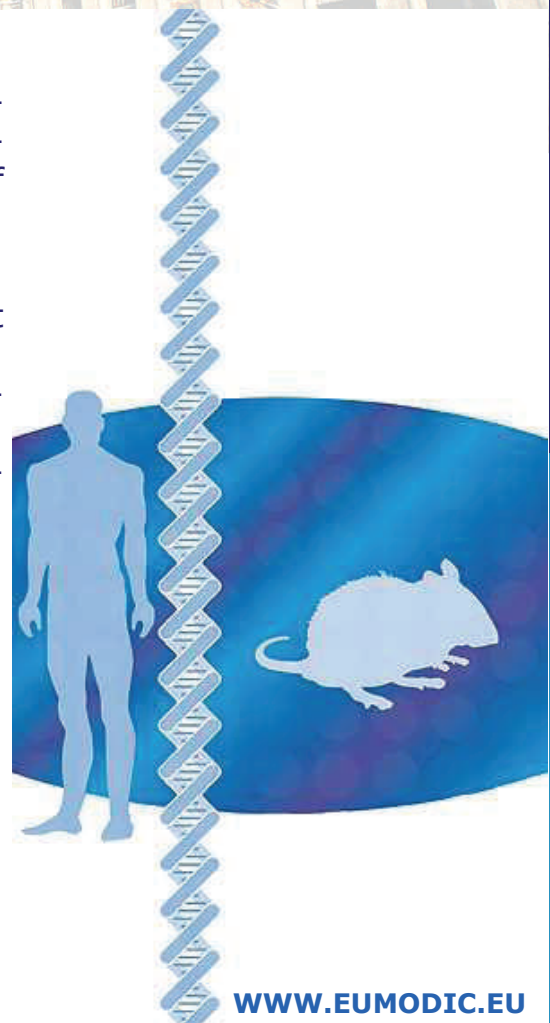

EUMODIC - the European Mouse Disease Clinic
Funded by the European Commission under FP6
Comprehensive phenotyping of 500 knock-out mouse lines

Aims of the Meeting

Participants will present information on interesting new mutants from the primary phenotyping as well as in depth phenotyping of mouse models.

Topics:

- Aims and progress of the high throughput phenotyping
- Informatics solutions to storing and displaying phenotyping data
- International Mouse Phenotyping Consortium
- Mouse models of specific disease areas:
 - Clinical chemistry, haematology & metabolic
 - Cardiovascular
 - Respiratory
 - Infection and immune response
 - Behaviour, cognitive & nervous system
 - Sensory
 - Skeletomuscular
 - Pathology & cancer
